Cited document:

D1: US3869021 A

D1 is considered to represent the most relevant prior art cited in the International Search Report.

D1 reveals a mounting plate which corresponds with the preamble of claim 1 and a safety device which corresponds with the preamble of claim 11.

The invention according to claims 1 and 11 differs from the art known from D1 in the sense that the mounting plate is plane in its extend and that, via the first opening and the second opening, is arranged in the harness in such a way that the mounting plate, when in use, juts out essentially at right angles from the body of the user, and extends in a vertical direction. The second opening is arranged as to be located, when in use, at a second distance in the vertical direction from the first opening.

Therefore the invention according to the claims is novel. The invention according to the claims is also considered to involve an inventive step and to be industrially applicable.
